## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over paper 'Surface Mount Transformers: A New Packaging Approach' by McCormick in view of Riordan et al. [US 4687898].

McCormick discloses a surface mount transformer having an open bottom body, two toroidal transformers within the body, and toroidal transformer having wires wrapped around thereon; terminal pins molded within the body [see page 27; columns 1-2]. McCormick discloses the invention as claimed except for notch post upon which the wire wrapped around. Riordan discloses a terminal pin having notches to permit wire wrapped around [abstract; figures 4-5]. At the time of the invention, it would have been obvious to a person of ordinary skill in the art to use terminal with notches as taught by Riordan for the reason above. Therefore, it would have been obvious to combine Riordan with McCormick.
